

ACCESS SERVICE**8. Digital Subscriber Line Access Services**

Digital Subscriber Line Access Services provide transmission services over local exchange service facilities that can be used for simultaneous voice and data communications. Service is provided, where available, between customer-designated premises and designated Telephone Company Serving Wire Centers.

(C)

8.1 Asymmetric Digital Subscriber Line Access Service**8.1.1 General**

Asymmetric Digital Subscriber Line (ADSL) Access Service enables data traffic generated by a customer-provided modem to be transported to a DSL Access Service Connection Point using the Telephone Company's local exchange service facilities. A DSL Access Service Connection Point is an interconnection point designated by the Telephone Company that aggregates data traffic from and to Telephone Company ADSL-equipped Serving Wire Centers (SWCs). The DSL Access Service Connection Point may be located within the operating territory of the Telephone Company for connections to Special Access Services, Frame Relay Access Service or in the operating territory of another telephone company, provided both telephone companies agree to such an arrangement.

(C)

When the DSL Access Service Connection Point is located within the Telephone Company's operating territory, the customer's ADSL Access Service must be connected to a single telecommunications service provider's (TSP's) customer designated premises using either the Telephone Company's Special Access Services, Frame Relay Access Service, or ATM-CRS.

(T)

(T)

When the DSL Access Service Connection Point is located in the operating territory of another telephone company, the customer's ADSL Access Service must be connected to a single TSP's customer designated premises using either equivalent frame relay access service provided by the distant telephone company, or a combination of DSL Extended Transport provided by the Telephone Company and equivalent special access service provided by the distant telephone company.

ACCESS SERVICE8. Digital Subscriber Line Access Services (Cont'd)

(N)

8.1 Asymmetric Digital Subscriber Line Access Service (Cont'd)8.1.1 General (Cont'd)

ADSL Access Service is available as two service options, i.e.,
ADSL Voice-Data and ADSL Data-Only.

- (A) The ADSL Voice-Data option provides transmission of data signals at a peak data transmission speeds of 512 kbps upstream and 1.544 Mbps downstream using the Telephone Company's existing local exchange service line. This option may be used for simultaneous voice and data communications.
- (B) The ADSL Data-Only option provides transmission of data signals at peak transmission speeds of 512 kbps upstream and 1.544 Mbps downstream using the Telephone Company's existing local exchange facilities. This option does not provide the ability to transmit voice communications.

(N)

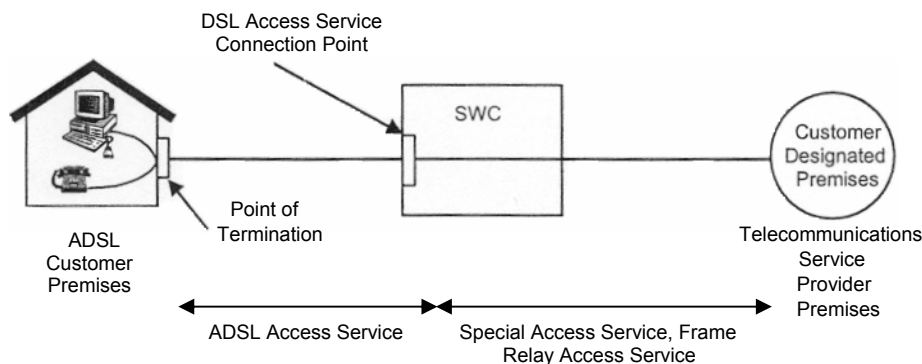

Transmittal No. 57

Issued: May 5, 2004

Effective: May 20, 2004

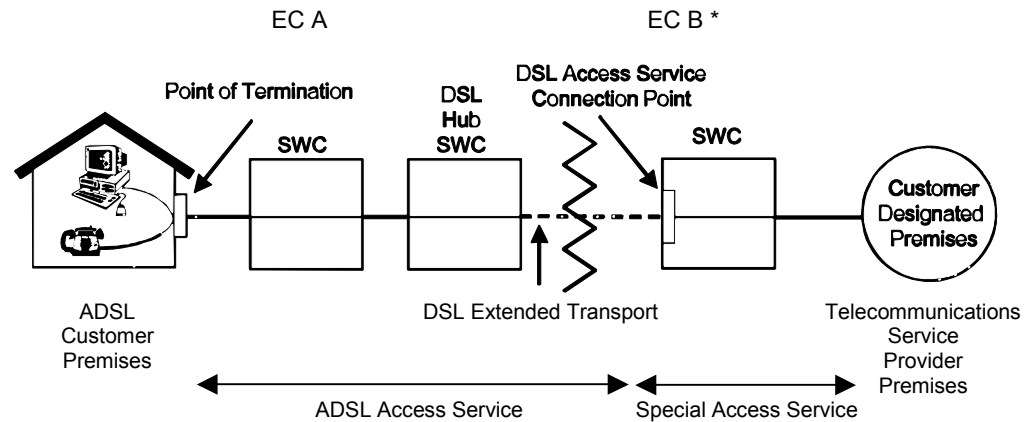

ACCESS SERVICE8. Digital Subscriber Line Access Services (Cont'd)8.1 Asymmetric Digital Subscriber Line Access Service (Cont'd)8.1.1 General (Cont'd)

A generic view of how ADSL Access Service could be interconnected with a TSP's network is depicted in the figure following. In the first example, the customer's ADSL-equipped Serving Wire Center and associated DSL Access Service Connection Point are located in the same office within the Telephone Company's operating territory. The ADSL Access Service customer orders ADSL Access Service pursuant to the provisions specified in this section. The ADSL Access Service customer's TSP orders Special Access Service and /or Frame Relay Access Service pursuant to the provisions specified in Section 7 preceding and Section 16 following, to connect its customer designated premises to the DSL Access Service Connection Point.

ADSL ACCESS SERVICE

ACCESS SERVICE8. Digital Subscriber Line Access Services (Cont'd)8.1 Asymmetric Digital Subscriber Line Access Service (Cont'd)8.1.1 General (Cont'd)

In the example shown below, the DSL Access Service Connection Point is located outside the Telephone Company's operating territory. The ADSL Access Service customer orders ADSL Access Service pursuant to the provisions specified in this section. In order to connect its customer designated premises to the DSL Access Service Connection Point using special access service, the ADSL Access Service customer's TSP orders DSL Extended Transport from the Telephone Company as specified in this section and equivalent special access service from the distant telephone company.

ADSL ACCESS SERVICE

* If EC B is a non-NECA company, the application of their charges will depend on their access tariff.

8.1.2 Limitations

ADSL Access Service is available as two service options as described above. (N)
 Unless otherwise specified in Section 8.1.6, following, ADSL Access Service is at a (T)
 maximum upstream speed of 512 kbps (i.e., from the customer's equipment up to the
 DSL Access Service Connection Point) and a maximum downstream speed of 1.544
 Mbps (i.e., from the DSL Access Service Connection Point down to the customer's
 equipment). These peak speeds are not guaranteed by the Telephone Company due
 to factors that may affect the actual speeds delivered, including the ADSL Access
 Service customer's distance from the Telephone Company Serving Wire Center,
 condition of the existing local exchange service facilities, and any capacity (C)
 limitations in the TSP's network design.

 326 South 2nd Street, Emmaus, Pennsylvania 18049

ACCESS SERVICE8. Digital Subscriber Line Access Services (Cont'd)8.1 Asymmetric Digital Subscriber Line Access Service (Cont'd)8.1.2 Limitations (Cont'd)

The Telephone Company does not provide customer premises equipment (CPE) in conjunction with the ADSL Access Service offering. ADSL Access Service may not be used in conjunction with multi-point Special Access Service Configurations as described in Section 7.1.3 preceding.

(M)

|

(M)

ADSL Access Service will be furnished where suitable facilities exist as determined by the Telephone Company. The Telephone Company will identify its ADSL-equipped Serving Wire Centers, DSL Access Service Connection Point Serving Wire Centers, and, if applicable, DSL Transport Hub Serving Wire Centers in the NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. TARIFF F.C.C. NO. 4. The Telephone Companies listed in Section 8.1.6, following, will offer ADSL Access Service under the provisions specified in Section 8.1.

ADSL Access Service will be provided over existing Telephone Company local exchange service facilities. The rates and regulations for ADSL Access Service are in addition to any rates and regulations that apply for the associated local exchange service line provided under the terms and conditions in the Telephone Company's general and/or local exchange service tariffs. The Telephone Company will automatically disconnect ADSL Access Service option when the associated local exchange service line is disconnected for any reason.

Rates and regulations for Special Access Services Frame Relay Access Service and Asynchronous Transfer Mode Cell Relay Access Service provided under this tariff will apply for the access service(s) provided between the TSP's customer designated premises and the DSL Access Service Connection Point, as described in Section 7, preceding, and Section 16, following.

Certain material currently found on this page previously appeared on 1st Revised Page 8-3.

Transmittal No. 57

Effective: May 20, 2004

ACCESS SERVICE**8. Digital Subscriber Line Access Services (Cont'd)****8.1 Asymmetric Digital Subscriber Line Access Service (Cont'd)****8.1.3 Undertaking of the Telephone Company**

The Telephone Company will provide ADSL Access Service at rates and charges as set forth in Sections 17 as follows:

- (A) The Telephone Company will determine if the associated local exchange service line or facilities are suitable for use with ADSL Access Service option ordered by the customer. Service will not be provided on lines that the Telephone Company determines are not suitable for ADSL Access Service or on lines that produce interference with other services provided by the Telephone Company. (C)
- (B) The Telephone Company, after determining if the facilities are suitable for ADSL Access Service, will notify the customer if any additional CPE is necessary to support ADSL Access Service.
- (C) The Telephone Company will provision and maintain ADSL Access Service from the DSL Access Service Connection Point to the Point of Termination at the ADSL Access Service customer's premises, excepted as provided for in Section 8.1.5(D) following.
- (D) The Telephone Company will notify the ADSL Access Service customer's TSP when DSL Extended Transport, as described in Section 8.1.5(D), following, is required.

8.1.4 Obligations of the Customer

In addition to the regulations described in other sections of this tariff, the following provisions apply to ADSL Access Service:

- (A) The customer is responsible for providing the Telephone Company with the necessary information to provision ADSL Access Service [e.g., customer name, telephone number and premises address; billing name and address when different from the customer name and premise address; its internet Protocol (IP) address; and the contact name and telephone number of the TSP with which the customer's ADSL Access Service will interconnect].
- (B) The customer is responsible for providing and maintaining all required customer provided equipment (CPE), which is compatible with ADSL Access Service and complies with the standards specified in Technical Reference ANSI T1.413-1998, except as otherwise specified in Section 8.1.6, following.

Transmittal No. 57

Issued: May 5, 2004

Effective: May 20, 2004

ACCESS SERVICE**8. Digital Subscriber Line Access Services (Cont'd)****8.1 Asymmetric Digital Subscriber Line Access Service (Cont'd)****8.1.4 Obligations of the Customer (Cont'd)**

- (C) Where required, the ADSL Access Service customer's TSP will order DSL Extended Transport from each Telephone Company designated DSL Transport Hub to its associated DSL Access Service Connection Point as described in Section 8.1.5(D), following.

8.1.5 Rate Regulations

This section contains the regulations governing the rates and charges that apply for ADSL Access Service. Regulations governing the rates and charges for the Special Access and Frame Relay Access Services provided under this tariff used in conjunction with ADSL Access Service are as specified in Section 7, preceding, and Section 16, following.

(A) Minimum Period

The minimum period for which ADSL Access Service is provided to a customer and for which charges are applicable is one month.

(B) Moves

A move involves a change in the physical location of one of the following:

- The Point of Termination at the ADSL Access Service customer designated premises
- The ADSL Access Service customer-designated premises

The provisions for moves of ADSL Access Service are the same as those described in Section 7.2.3, preceding, except that an Access Order Charge will not apply.

(C) Temporary Suspension of Service

When the associated local exchange service line over which ADSL Access Service is provided is temporarily suspended, the ADSL Access Service and one-half of the ADSL Line Charge monthly rate will be temporarily suspended for the time period that the associated local exchange service is suspended.

ACCESS SERVICE8. Digital Subscriber Line Access Services (Cont'd)8.1 Asymmetric Digital Subscriber Line Access Service (Cont'd)8.1.5 Rate Regulations (Cont'd)(D) DSL Extended Transport

DSL Extended Transport is required when: 1) the Telephone Company providing ADSL Access Service locates its DSL Access Service Connection Point outside its operating territory in the operating territory of another telephone company and 2) the ADSL Access Service customer's TSP connects its customer designated premises to the DSL Access Service Connection Point using Special Access Service described in Section 7, preceding, or equivalent special access service provided by the distant telephone company.

DSL Extended Transport provides the TSP with a virtual circuit path capable of supporting a peak data speed of up to 1.544 Mbps between a Telephone Company-designated DSL Transport Hub and its associated DSL Access Service Connection Point location. The Telephone Company must designate at least one DSL Transport Hub SWC location within its operating territory when it locates a DSL Access Service Connection Point outside its operating territory. The DSL Transport Hub aggregates ADSL and/or SDSL Access Services data traffic within the operating territory of the Telephone Company providing the DSL Access Service.

DSL Extended Transport is used to transmit ADSL and/or SDSL data traffic. The TSP is responsible for determining and ordering the number of DSL Extended Transport virtual circuit paths it requires to meet its end users' data transmission needs. The TSP must place an order for at least one DSL Extended Transport virtual circuit path, where required, when it places the order for Special Access Service (or equivalent special access service) to connect its customer designated premises to the DSL Access Service Connection Point. An Access Order Charge applies per order for the installation of DSL Extended Transport.

ACCESS SERVICE8. Digital Subscriber Line Access Services (Cont'd)8.1 Asymmetric Digital Subscriber Line Access Service (Cont'd)8.1.5 Rate Regulations (Cont'd)(D) DSL Extended Transport (Cont'd)

DSL Extended Transport is available between a DSL Transport Hub SWC and the associated DSL Access Service Connection Point SWC located within the United States. It is also available between a DSL Transport Hub SWC and a cross border connection point located within the United States when the Telephone Company has located its designated DSL Access Service Connection Point in Canada.

(C)

(C)

When the DSL Access Service Connection Point is located in Canada, DSL Extended Transport will be furnished by the Telephone Company to a cross border connection point located in the United States. DSL Extended Transport from the cross border connection point to the DSL Access Service Connection Point will be provided by the Canadian telephone company. The Telephone Company will work cooperatively with the TSP and Canadian Telephone Company for the provisioning of DSL Extended Transport in Canada. Rates and regulations defined in this section only apply to that portion of the service between the DSL Transport HUB and the cross border connection point.

(N)

(1) Mileage Measurement

(N)

- (a) The mileage to be used to determine the monthly charges for each DSL Extended Transport virtual circuit path is calculated using the airline distance between each DSL Transport Hub and its associated DSL Access Service Connection Point when both locations are within the United States. To determine the applicable monthly charges, first compute the mileage using the V&H coordinates method, as described in the NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. TARIFF F.C.C. NO. 4. When the calculation results in a fraction of a mile, always round up to the next whole mile before determining the total mileage and applying the rates. Once the total mileage for each path is determined, multiply the number of miles times the DSL Extended Transport per mile rates specified in Section 17 following.

(C)

(C)

ACCESS SERVICE8. Digital Subscriber Line Access Services (Cont'd)

(N)

8.1 Asymmetric Digital Subscriber Line Access Service (Cont'd)8.1.5 Rate Regulations (Cont'd)(D) DSL Extended Transport (Cont'd)(1) Mileage Measurement (Cont'd)

(a) (Cont'd)

(N)

Example:

(M)

— TSP orders two DSL Extended Transport paths between a DSL Transport Hub SWC and the associated DSL Access Service Connection Point SWC. Both SWCs are located within the United States.

(M)

(C)

|

(C)

— Total mileage between the SWCs is calculated at 28.4 miles.

(M)

Monthly charges for DSL Extended Transport are determined as follows:

— Fractional mileage rounded up to the next whole mile equals 29 miles.

— First 25 miles x \$0.00 per mile equals \$0.00 per path.

— Next four miles x \$15.31 per mile equals \$61.24 per path.

— Total mileage charges for DSL Extended Transport in this example equal \$122.48 per month (i.e., \$61.24 x two paths).

(M)

(b) The mileage to be used to determine the monthly charges for each DSL Extended Transport virtual circuit path between a DSL Transport Hub and a cross border connection point is specified below. To calculate the monthly charges for each path, multiply the number of miles between the DSL Transport Hub and the cross border connection point times the DSL Extended Transport per mile rates specified in Section 17 following. The portion of the DSL Extended Transport furnished from the cross border connection point to the DSL Access Service Connection Point is the responsibility of the TSP and is not covered in this tariff as described in Section 8.1.5(D) above.

(N)

(N)

ACCESS SERVICE8. Digital Subscriber Line Access Services (Cont'd)8.1 Asymmetric Digital Subscriber Line Access Service (Cont'd)8.1.5 Rate Regulations (Cont'd)(E) Rate Categories

There are three types of rates and charges applicable to ADSL Access Service. These are a monthly rate, a nonrecurring charge and a network reconfiguration charge.

The monthly rate for the ADSL Line Charge applies each month or fraction thereof for each ADSL Voice-Data option and ADSL Data-Only option ordered by the customer. The monthly rate for DSL Extended Transport applies each month or fraction thereof for each 1.544 Mbps virtual circuit path as described in Section 8.1.5(D), preceding. (C)

A nonrecurring charge applies for each ADSL Voice-Data option and ADSL Data-only option ordered by the customer line for the installation of ADSL Access Service. The nonrecurring charge will be waived for each ADSL Voice-Data option and ADSL Data-Only option ordered when the customer commits to retain ADSL Access Line for a minimum period of 12 months following installation. If the ADSL Access Line is disconnected for any reason prior to end of 12-month minimum commitment period other than for ADSL option conversions as described below, the Telephone Company will bill the customer an amount equal to the waived nonrecurring charge. (C)

All changes to existing ADSL Access Service (e.g., a change of TSP and restoral of the ADSL Access Service following a disconnect for non-payment of charges and/or a disconnect of the associated local exchange service line for any reason), other than changes involving ADSL option conversions, DSL network reconfigurations and administrative activities, as described below, will be treated as a discontinuance of the existing service and an installation of a new service. A nonrecurring installation charge will apply per ADSL Access Service line for this work activity. (C)

A DSL Network Reconfiguration Charge applies when the ADSL Access Service customer's TSP requests the Telephone Company to modify the Telephone Company's network to: 1) accommodate a change in the ADSL Access Service customer's existing IP address or 2) limit the data speed delivered over the customer's existing ADSL Access Service line. This charge applies for each request per ADSL Access Service line. The Telephone Company will bill the DSL Network Reconfiguration Charge to the ADSL Access Service customer's TSP.

Transmittal No. 50

Issued: April 24, 2003

Effective: May 9, 2003

ACCESS SERVICE**8. Digital Subscriber Line Access Services (Cont'd)****8.1 Asymmetric Digital Subscriber Line Access Service (Cont'd)****8.1.5 Rate Regulations (Cont'd)****(E) Rate Categories (Cont'd)**

The following administrative changes will be made without charge to the customer:

- Change of customer premises address when the change of address is not a result of a physical relocation of equipment,
- Change in billing data (name, address or contact name or telephone),
- Change of billing account number,
- Change of agency authorization that requires no changes to the Telephone Company's network,
- Change of customer contact name or telephone number, and
- Change of jurisdiction.

Rates and charges for ADSL Access Service are as set forth in Section 17, following, when the customer purchases ADSL Access Service under the DSL Access Services Discount Pricing Arrangement described in Section 8.3, following. The DSL Network Reconfiguration Charge is as set forth in Section 17, following. The rate for DSL Extended Transport is as set forth in Section 17, following.

8.1.6 Exceptions

- (A) The Telephone Companies listed below offer ADSL Access Service as described in Section 8.1 preceding and Section 8.3, following, with the following exceptions:
- (1) In lieu of the provision specified in Section 8.1.3(B), preceding, the Telephone Company, after determining if the facilities are suitable for ADSL Access Service, will notify the customer if the customer's CPE is compatible with the equipment deployed in the Telephone Company's Serving Wire Center and, if any additional CPE is necessary to support ADSL Access Service.

ACCESS SERVICE8. Digital Subscriber Line Access Services (Cont'd)8.1 Asymmetric Digital Subscriber Line Access Service (Cont'd)8.1.6 Exceptions (Cont'd)

(A) (Cont'd)

- (2) In lieu of the provision specified in Section 8.1.4(B), preceding, the customer is responsible for providing and maintaining all required customer provided equipment (CPE), which is compatible with ADSL Access Service.

Transmittal No. 45

Issued: September 3, 2002

Effective: September 18, 2002

ACCESS SERVICE8. Digital Subscriber Line Access Services (Cont'd)8.2 Symmetric Digital Subscriber Line Access Service8.2.1 General

Symmetric Digital Subscriber Line (SDSL) Access Service provides the customer the ability to transmit data to (upstream rate) and receive data from (downstream rate) a DSL Access Service Connection Point at the same speed using the Telephone Company's existing local exchange facilities. ADSL Access Service Connection Point is an interconnection point designated by the Telephone Company that aggregates data traffic from and to Telephone Company SDSL-equipped Serving Wire Centers (SWCs). The DSL Access Service Connection Point may be located within the operating territory of the Telephone Company or in the operating territory of another telephone company, provided both telephone companies agree to such an arrangement. (C)

When the DSL Access Service Connection Point is located within the Telephone Company's operating territory, the customer's SDSL Access Service must be connected to a telecommunications service provider's (TSP's) customer designated premise using either the Telephone Company's Special Access, Frame Relay or ATM Access Services. When the DSL Access Service Connection Point is located in the operating territory of another telephone company, the customer's SDSL Access Service must be connected to a TSP's customer designated premises using either equivalent frame relay access service provided by the distant telephone company, or a combination of DSL Extended Transport provided by the Telephone Company and equivalent special access service provided by the distant telephone company.

SDSL Access Service is available as two service options, i.e., SDSL Voice-Data and SDSL Data-Only.

- (A) The SDSL Voice-Data option provides transmission of data signals at a peak data transmission speed of 768 kbps using the Telephone Company's existing local exchange service line. This option may be used for simultaneous voice and data communications.
- (B) The SDSL Data-Only option provides transmission of data signals at peak transmission speeds of 144 kbps, 768 kbps, 2 Mbps or 4 Mbps using the Telephone Company's existing local exchange facilities. This option does not provide the ability to transmit voice communications. (C)

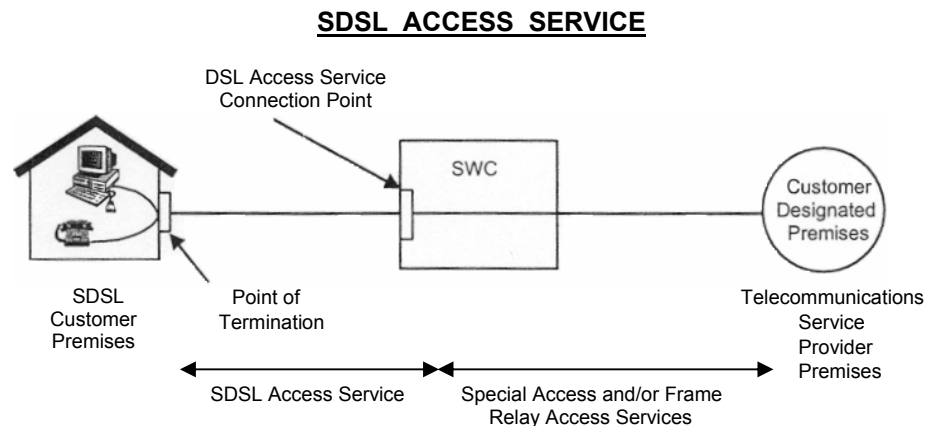

Transmittal No. 57

Issued: May 5, 2004

Effective: May 20, 2004

ACCESS SERVICE8. Digital Subscriber Line Access Services (Cont'd)8.2 Symmetric Digital Subscriber Line Access Service (Cont'd)8.2.1 General (Cont'd)

A generic view of how SDSL Access Service could be interconnected with a TSP's network is depicted in the figures following. In the first example, the customer's SDSL-equipped Serving Wire Center and associated DSL Access Service Connection Point are located in the same office within the Telephone Company's operating territory. The SDSL Access Service customer orders SDSL Access Service pursuant to the provisions specified in this section. The SDSL Access Service customer's TSP orders Special Access Service and/or Frame Relay Access Service pursuant to the provisions specified in Section 7, preceding, and Section 16, following, to connect its customer-designated premises to the DSL Access Service Connection Point. (C)

ACCESS SERVICE8. Digital Subscriber Line Access Services (Cont'd)8.2 Symmetric Digital Subscriber Line Access Service (Cont'd)8.2.1 General (Cont'd)

In the example shown below, the DSL Access Service Connection Point is located outside the Telephone Company's operating territory. The SDSL Access Service customer orders SDSL Access Service pursuant to the provisions specified in this section. In order to connect its customer designated premises to the DSL Access Service Connection Point using special access service, the SDSL Access Service customer's TSP orders DSL Extended Transport from the Telephone Company as specified in this section and equivalent special access service from the distant telephone company.

* If EC B is a non-NECA company, the application of their charges will depend on their access tariff.

ACCESS SERVICE8. Digital Subscriber Line Access Services (Cont'd)8.2 Symmetric Digital Subscriber Line Access Service (Cont'd)8.2.2 Limitations

SDSL Access Service is available as two service options as described above. Peak speeds are not guaranteed by the Telephone Company due to factors that may affect the actual speeds delivered, including the SDSL Access Service customer's distance from the Telephone Company Serving Wire Center, condition of the existing local exchange service facilities, and any capacity limitations in the TSP's network design. (C)

The Telephone Company does not provide customer premises equipment (CPE) in conjunction with the SDSL Access Service offering.

SDSL Access Service may not be used in conjunction with multi-point Special Access Service configurations as described in Section 7.1.3 preceding.

DSL Extended Transport is not available when the associated SDSL Data-Only option is ordered at speeds of 2 Mbps or 4 Mbps.

SDSL Access Service will be furnished where suitable facilities exist as determined by the Telephone Company. The Telephone Company will identify its SDSL-equipped Serving Wire Centers, DSL Access Service Connection Point Serving Wire Centers, and, if applicable, DSL Transport Hub Serving Wire Centers in the NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. Tariff F.C.C. NO. 4. The Telephone Companies listed in Section 17, following, will offer SDSL Access Service under the provisions specified in Section 8.2.

SDSL Access Service will be provided over existing Telephone Company local exchange service facilities. When the customer orders the SDSL Voice-Data option, the rates and regulations for SDSL Access Service are in addition to any rates and regulations that apply for the associated local exchange service line provided under the terms and conditions in the Telephone Company's general and/or local exchange service tariffs. The Telephone Company will automatically disconnect the SDSL Access Service Voice-Data option when the associated local exchange service line is disconnected for any reason.

Rates and regulations for Special Access Service and Frame Relay Access Service e provided under this tariff will apply for the access service(s) provided between the TSP's customer designated premises and the DSL Access Service Connection Point, as described in Section 7, preceding, and Section 16, following.

Transmittal No. 57

Issued: May 5, 2004

Effective: May 20, 2004

ACCESS SERVICE

8. Digital Subscriber Line Access Services (Cont'd)

8.2 Symmetric Digital Subscriber Line Access Service (Cont'd)

8.2.3 Undertaking of the Telephone Company

The Telephone Company will provide SDSL Access Service at the rates and charges set forth in Sections 17 as follows:

- (A) The Telephone Company will determine if the associated local exchange service line or facilities are suitable for use with the SDSL Access Service option ordered by the customer. Service will not be provided on facilities that the Telephone Company determines are not suitable for SDSL Access Service or on facilities that produce interference with other services provided by the Telephone Company. (C)
- (B) The Telephone Company, after determining if the facilities are suitable for SDSL Access Service, will notify the customer if the customer's CPE is compatible with the equipment deployed in the Telephone Company's Serving Wire Center and if any additional CPE is necessary to support SDSL Access Service.
- (C) The Telephone Company will provision and maintain SDSL Access Service from the DSL Access Service Connection Point to the Point of Termination at the SDSL Access Service customer's premises except as provided for in Section 8.2.5(D) following.
- (D) The Telephone Company will notify the SDSL Access Service customer's TSP when DSL Extended Transport, as described in Section 8.2.5(D), following, is required.

Transmittal No. 57

Issued: May 5, 2004

Effective: May 20, 2004

ACCESS SERVICE8. Digital Subscriber Line Access Services (Cont'd)8.2 Symmetric Digital Subscriber Line Access Service (Cont'd)8.2.4 Obligations of the Customer

In addition to the regulations described in other sections of this tariff, the following provisions apply to SDSL Access Service:

- (A) The customer is responsible for providing the Telephone Company with the necessary information to provision SDSL Access Service (e.g., customer name, telephone number and premises address; billing name and address when different from the customer name and premises address; its Internet Protocol (IP) address; and the contact name and telephone number of the TSP with which the customer's SDSL Access Service will interconnect).
- (B) The customer is responsible for providing and maintaining all required customer provided equipment (CPE), which is compatible with SDSL Access Service.
- (C) Where required, the SDSL Access Service customer's TSP will order DSL Extended Transport from each Telephone Company designated DSL Transport Hub to its associated DSL Access Service Connection Point as described in Section 8.2.5 (D), following.

ACCESS SERVICE8. Digital Subscriber Line Access Services (Cont'd)8.2 Symmetric Digital Subscriber Line Access Service (Cont'd)8.2.5 Rate Regulations

This section contains the regulations governing the rates and charges that apply for SDSL Access Service. Regulations governing the rates and charges for the Special Access and Frame Relay Access Services provided under tariff used in conjunction with SDSL Access Service are as specified in Section 7 preceding, and Section 16, following.

(A) Minimum Period

The minimum period for which SDSL Access Service is provided to a customer and for which charges are applicable is one month.

(B) Moves

A move involves a change in the physical location of one of the following:

- The Point of Termination at the SDSL Access Service customer designated premises
- The SDSL Access Service customer designated premises

The provisions for moves of SDSL Access Service are the same as those described in Section 7.2.3, preceding, except that an Access Order Charge will not apply to move orders for the SDSL Access Service Voice-Data option.

(C) Temporary Suspension of Service

When the associated local exchange service line over which the SDSL Voice-Data option is provided is temporarily suspended, the SDSL Access Service and one-half of the SDSL Line Charge monthly rate will be temporarily suspended for the time period that the associated local exchange service is suspended.

ACCESS SERVICE8. Digital Subscriber Line Access Services (Cont'd)8.2 Symmetric Digital Subscriber Line Access Service (Cont'd)8.2.5 Rate Regulations (Cont'd)(D) DSL Extended Transport

DSL Extended Transport is required when: 1) the Telephone Company providing SDSL Access Service locates its DSL Access Service Connection Point outside its operating territory in the operating territory of another telephone company and 2) the SDSL Access Service customer's TSP connects its customer designated premises to the DSL Access Service Connection Point using Special Access Service described in Section 7, preceding, or equivalent special access service provided by the distant telephone company.

DSL Extended Transport provides the TSP with a virtual circuit path capable of supporting a peak data speed of up to 1.544 Mbps between a Telephone Company-designated DSL Transport Hub and its associated DSL Access Service Connection Point location. The Telephone Company must designate at least one DSL Transport Hub SWC location within its operating territory when it locates a DSL Access Service Connection Point outside its operating territory. The DSL Transport Hub aggregates ADSL and/or SDSL Access Services data traffic within the operating territory of the Telephone Company providing the DSL Access Service.

DSL Extended Transport is not available when the associated SDSL Data-Only option is ordered at speeds of 2 Mbps or 4 Mbps. (N)
(N)

DSL Extended Transport is used to transmit ADSL and/or SDSL data traffic. The TSP is responsible for determining and ordering the number of DSL Extended Transport virtual circuit paths it requires to meet its end users' data transmission needs. The TSP must place an order for at least one DSL Extended Transport virtual circuit path, where required, when it places the order for Special Access Service (or equivalent special access service) to connect its customer designated premises to the DSL Access Service Connection Point. An Access Order Charge applies per order for the installation of DSL Extended Transport.

Transmittal No. 50

Issued: April 24, 2003

Effective: May 9, 2003

ACCESS SERVICE8. Digital Subscriber Line Access Services (Cont'd)8.2 Symmetric Digital Subscriber Line Access Service (Cont'd)8.2.5 Rate Regulations (Cont'd)(D) DSL Extended Transport (Cont'd)

DSL Extended Transport is available between a DSL Transport Hub SWC and the associated DSL Access Service Connection Point SWC located within the United States. It is also available between a DSL Transport Hub SWC and a cross border connection point located within the United States when the Telephone Company has located its designated DSL Access Service Connection Point in Canada.

(C)

(C)

When the DSL Access Service Connection Point is located in Canada, DSL Extended Transport will be furnished by the Telephone Company to a cross border connection point located in the United States. DSL Extended Transport from the cross border connection point to the DSL Access Service Connection Point will be provided by the Canadian telephone company. The Telephone Company will work cooperatively with the TSP and Canadian Telephone Company for the provisioning of DSL Extended Transport in Canada. Rates and regulations defined in this section only apply to that portion of the service between the DSL Transport HUB and the cross border connection point.

(N)

(1) Mileage Measurement

(N)

- (a) The mileage to be used to determine the monthly charges for each DSL Extended Transport virtual circuit path is calculated using the airline distance between each DSL Transport Hub and its associated DSL Access Service Connection Point when both locations are within the United States. To determine the applicable monthly charges, first compute the mileage using the V&H coordinates method, as described in the NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. TARIFF F.C.C. NO. 4. When the calculation results in a fraction of a mile, always round up to the next whole mile before determining the total mileage and applying the rates. Once the total mileage for each path is determined, multiply the number of miles times the DSL Extended Transport per mile rates specified in Section 17 following.

ACCESS SERVICE8. Digital Subscriber Line Access Services (Cont'd)

(N)

8.2 Asymmetric Digital Subscriber Line Access Service (Cont'd)8.2.5 Rate Regulations (Cont'd)(D) DSL Extended Transport (Cont'd)(1) Mileage Measurement (Cont'd)

(a) (Cont'd)

(N)

Example:

(M)

— TSP orders two DSL Extended Transport paths between a DSL Transport Hub SWC and the associated DSL Access Service Connection Point SWC. Both SWCs are located within the United States.

(M)

(C)

|

(C)

— Total mileage between the SWCs is calculated at 28.4 miles.

(M)

Monthly charges for DSL Extended Transport are determined as follows:

— Fractional mileage rounded up to the next whole mile equals 29 miles.

— First 25 miles x \$0.00 per mile equals \$0.00 per path.

— Next four miles x \$15.31 per mile equals \$61.24 per path.

— Total mileage charges for DSL Extended Transport in this example equal \$122.48 per month (i.e., \$61.24 x two paths).

(M)

(b) The mileage to be used to determine the monthly charges for each DSL Extended Transport virtual circuit path between a DSL Transport Hub and a cross border connection point is specified below. To calculate the monthly charges for each path, multiply the number of miles between the DSL Transport Hub and the cross border connection point times the DSL Extended Transport per mile rates specified in Section 17 following. The portion of the DSL Extended Transport furnished from the cross border connection point to the DSL Access Service Connection Point is the responsibility of the TSP and is not covered in this tariff as described in Section 8.2.5(D) above.

(N)

ACCESS SERVICE8. Digital Subscriber Line Access Services (Cont'd)8.2 Symmetric Digital Subscriber Line Access Service (Cont'd)8.2.5 Rate Regulations (Cont'd)(E) Rate Categories

There are three types of rates and charges applicable to SDSL Access Service. These are a monthly rate, a nonrecurring charge and a network reconfiguration charge.

The monthly rate for the SDSL Line Charge applies each month or fraction thereof for each SDSL Voice-Data option and SDSL Data-Only option ordered by the customer. The monthly rate for DSL Extended Transport applies each month or fraction thereof for each 1.544 Mbps virtual circuit path as described in Section 8.2.5(D), preceding.

A nonrecurring charge applies for each SDSL Voice-Data and SDSL Data-Only option ordered by the customer for the installation of SDSL Access Service. The nonrecurring charge will be waived for each new SDSL Voice-Data option Access Line ordered when the customer commits to retain the SDSL Voice-Data option Access Line for a minimum period of 12 months following installation of service. If the SDSL Voice-Data option Access Line is disconnected for any reason prior to the end of the 12-month minimum commitment period, the Telephone Company will bill the customer an amount equal to the waived nonrecurring charge.

(N)
—
(N)

All changes to existing SDSL Access Service (e.g., a change of service option, change of service level speed, change of TSP, and restoral of the SDSL Access Service following a disconnect for non-payment of charges and/or a disconnect of the associated local exchange service line for any reason) other than changes involving DSL network reconfigurations and administrative activities, will be treated as a discontinuance of the existing service and an installation of a new service. A nonrecurring installation charge will apply per SDSL Access Service line for this work activity.

A DSL Network Reconfiguration Charge applies when the SDSL Access Service customer's TSP requests the Telephone Company to modify the Telephone Company's network to: 1) accommodate a change in the SDSL Access Service customer's existing IP address or 2) limit the data speed delivered over the customer's existing SDSL Access Service line. This charge applies for each request per SDSL Access Service line. The Telephone Company will bill the DSL Network Reconfiguration Charge to the SDSL Access Service customer's TSP.

Transmittal No. 50

Issued: April 24, 2003

Effective: May 9, 2003

ACCESS SERVICE8. Digital Subscriber Line Access Services (Cont'd)8.2 Symmetric Digital Subscriber Line Access Service (Cont'd)8.2.5 Rate Regulations (Cont'd)(E) Rate Categories (Cont'd)

The following administrative changes will be made without charge to the customer:

- Change of customer premises address when the change of address is not a result of physical relocation of equipment,
- Change in billing data (name, address or contact name or telephone),
- Change of billing account number,
- Change of agency authorization that requires no changes to the Telephone Company's network,
- Change of customer contact name or telephone number, and
- Change of jurisdiction.

Rates and charges for SDSL Access Service are as set forth in Section 17 following, when the customer purchases SDSL Access Service under the DSL Access Services Discount Pricing Arrangement described in Section 8.3 following. The DSL Network Reconfiguration Charge is as specified in Section 17 following. The rate for DSL Extended Transport is as set forth in Section 17 following.

ACCESS SERVICE**8. Digital Subscriber Line Access Services (Cont'd)****8.3 DSL Access Services Discount Pricing Arrangement****8.3.1 General**

The telecommunications services offered under the DSL Access Services Discount Pricing Arrangement (DPA) are provided at wholesale rates to the customer under the conditions listed below.

- (A) The customer purchases ADSL and/or SDSL Access Service as described in Sections 8.1 and 8.2, preceding, for the purpose of combining these telecommunications services with its own information service(s) to create a new retail service for sale to its end user customer(s).
- (B) In addition to the obligations specified in Sections 8.1.4 and 8.2.4, preceding, the customer assumes the following obligations:
 - (1) The customer will deal directly with its end user customers with respect to all matters pertaining to the service provided, including marketing, sales, ordering, installation, maintenance, trouble reporting, repair, billing and collections. The customer will not direct its end users to contact the Telephone Company for any aspect of the service the customer provides.
 - (2) The customer will submit orders for ADSL and/or SDSL Access Service to the Telephone Company in a format and manner designated by the Telephone Company.
 - (3) The customer will obtain the appropriate authorization to allow the Telephone Company to provision ADSL or SDSL Voice-Data Access Service over the customer's end user's existing telephone exchange service line.

When the customer purchases ADSL and/or SDSL Access Service under the DSL Access Services DPA, the rates and charges in Section 17 following, will apply in lieu of the rates and charges specified in Section 17 following, for ADSL Access Service and/or in Section 17 following, for SDSL Access Service. The DSL Access Services DPA is only available from those Telephone Companies listed in Section 17 following.

ACCESS SERVICE8. Digital Subscriber Line Access Services (Cont'd)8.3 DSL Access Services Discount Pricing Arrangement8.3.1 General (Cont'd)

Services provided under the DSL Access Services DPA are available under a Monthly Plan at the rates and charges specified in Section 17 following, or under a Term Plan described in Section 8.3.2 following, at the rates and charges specified in Section 17 following.

A monthly charge applies for each ADSL and/or SDSL Access Service line covered under the DPA. A nonrecurring charge applies for the installation of each ADSL and/or SDSL Access Service line under the DPA. A DSL Network Reconfiguration Charge would apply for each requested reconfiguration for each ADSL and/or SDSL Access Service line covered under the DPA.

The Telephone Company will bill the customer an Access Order Charge, per order, to convert in-service ADSL and/or SDSL Access Service lines originally purchased under the provisions specified in Sections 8.1 and/or 8.2, preceding, to the DSL Access Services DPA, provided the customer obtains written authorization from its end users authorizing such conversions, where necessary. Per line nonrecurring charges specified in Section 17 following, do not apply to conversion of in-service ADSL and/or SDSL Access Lines to a DPA.

8.3.2 Term Plan(A) Description

The Term Plan provides the customer with reduced rates based on the length of the customer's term commitment and its selected pricing option. The Term Plan is available for terms of one or three years with a choice of three pricing options. The Telephone Company will establish a Term Plan for each Serving Wire Center (SWC) based on the customer's order notifying the Telephone Company which ADSL and/or SDSL-equipped SWC(s) the customer wants included in the plan(s) and its selected term commitment and pricing option for each SWC. An Access Order Charge applies for each order to establish the initial Term Plan(s). (C)

Transmittal No. 57

Issued: May 5, 2004

Effective: May 20, 2004

ACCESS SERVICE8. Digital Subscriber Line Access Services (Cont'd)8.3 DSL Access Services Discount Pricing Arrangement8.3.2 Term Plan (Cont'd)(A) Description (Cont'd)

When the customer subscribes to a Term Plan, all in-service ADSL and/or SDSL Access Service lines provided out of and subsequently installed at the included SWC will be billed the rates and charges specified in Section 17 following, for the length of the term commitment. In addition to the applicable ADSL and/or SDSL Line Charges, the customer will be billed a recurring monthly Term Plan Charge for each SWC included in a Term Plan, as specified in Section 17 following, based on its selected pricing option.

If the Telephone Company decreases the rates specified in Section 17 following, during the term of a commitment period, the decreased rates will automatically be applied for the remainder of the current commitment period.

At the end of the Term Plan, the customer may elect to establish a new Term Plan commitment, convert to the rates available under the Monthly Plan, or discontinue service. If the customer does not make an election by the end of the Term Plan, the rates for all ADSL and/or SDSL Access Service lines will automatically be converted to the rates available under the Monthly Plan specified in Section 17 following. An Access Order Charge will not apply to any election made by the customer at the end of the Term Plan.

A Term Plan is subject to payment for early termination as described in (D), following.

(B) Upgrades in Term Plan

A customer may terminate a Term Plan without the application of a termination liability charge when the customer replaces its original Term Plan commitment with a new Term Plan commitment provided the length and pricing option of the new Term Plan commitment is equal to or greater than the length and pricing option of the original Term Plan commitment. An Access Order Charge will not apply when the customer replaces an existing Term Plan with a new Term Plan commitment under this provision.

ACCESS SERVICE8. Digital Subscriber Line Access Services (Cont'd)8.3 DSL Access Services Discount Pricing Arrangement8.3.2 Term Plan (Cont'd)(C) Termination without Liability

A customer may terminate a Term Plan without the application of a termination liability charge if the Telephone Company increases the Term Plan monthly rates described in Section 17 following, during the term of the existing commitment. The customer has 90 days following such rate increase to notify the Telephone Company in writing of its intent to terminate its Term Plan under this section; otherwise, the increased rates will apply for the remainder of the commitment period.

(D) Termination with Liability

If the customer elects to terminate its Term Plan(s) prior to the end of the commitment period for any reason other than specified in Section 8.3.2(B) or 8.3.2(C), preceding, a termination liability charge will apply. For each Term Plan terminated prior to the end of the commitment period, the Telephone Company will bill the customer a charge equal to the monthly Term Plan Charge for its selected pricing option as specified in Section 17 following, multiplied by the number of months remaining in the commitment period.

Monthly Plan rates as described in Section 17 following, will apply to all in-service ADSL and/or SDSL Access Lines following the early termination of a Term Plan.
